**PERMABLOK<sup>3</sup>**  
ADVANCED VINYL PROTECTION **PLUS+**

## Improved dye resistance and cleaning

### BEFORE

After 1000 cycles rubbing against indigo sulfur black denim fabric (EMPA art. No. 128/1)

Improved resistance to stains/less discolouration

Improved removal of stain residues

### AFTER

Results after 1 hour: cleaned with soft colourless cloth, water, and neutral soap

Permablok<sup>3</sup> PLUS+ from Spradling<sup>®</sup> is a newly developed protective coating combining the well-known and proven Permablok<sup>3</sup> formula (anti-bacterial and anti-abrasion) with enhanced resistance to stains: it seals the surface, providing a shield against stains, makes cleaning easier and improves the removal of dye-transfer\*\*\*.

\*\*\*Removal of stains and indigo dye may vary depending on the type of textile, time of exposure, surrounding conditions, cleaning and maintenance of the material. PERMABLOK<sup>3</sup> PLUS+ offers improved protection to indigo dye and stains, yet full removal or cleaning cannot be guaranteed. Please read our cleaning and maintenance guide carefully to achieve the best results.

The results refer to the typical performance based on specific tests carried out under laboratory conditions and should not be construed to imply the behaviour of the product under real usage conditions.
